

I am 64 years of age and a retired educator of 40 years and have voted for Democrats and Republicans the last several years but I have become sick to my stomach(not really) about the direction George Bush has taken or is taking our country and I think it is a sad day in our history when a President can act like a dumb nut during a debate-jumped up to respond without following the rule and showed no manners at all toward the one he was debating-he was so shallow! Your company's stand in that you have encouraged your stations to support George Bush by running smear ads against John Kerry. It is a sad day in America that greed has begun to rule most decisions in government and decisions made in the business world. I am going to find the name of a station in our area and I promise you that I will never watch not one program from one of these stations. As for you the Federal Communications Commission if you can't be objective and do your job as a commission due to the fact you feel the pressure of the so called President we now have then I feel sorry for all of you. As George W. Truitt, a famous preacher from the state of Texas said many times, "There will be a payday someday" and I'm sorry that I won't have any part in the matter as God will make all of the decisions at that day.
